

## Ink logistics workflow

Netherland based GSE Dispensing has relaunched its Colorsat® Compact gravimetric flexo — gravure ink dispenser for the board and flexible packaging converter. The new version's greater modularity, easy operation and straightforward installation, gives a more flexible and economical way to enjoy effortless recipe management and controlled, repeatable colour consistency, for a fast return on investment.

The new Compact gives the converter more freedom to choose the specification level that suits budgetary requirements. Any number of base ink containers is possible between 12 and 32 components. It is extremely easy to install, use, clean and maintain. Special features include a combined wet and dry cleaning unit, stainless steel horizontal plates to prevent ink clogging, a modular tray design and simplified drum connections. Buckets can be placed or removed at a comfortable working height.

## Nampak Appointment

Nampak Cartons has strengthened its sales operation with the appointment of Ian Simpson as Sales Manager. His role will be to focus on new business development for Nampak's short run sites at Gillingham and Crewkerne, promoting the company's key strengths of award-winning design, flexibility and customer focus.
